

Datawitness Online Ltd.
Online Archiving & Witnessing

MailWitness™

DOCUMENT DELIVERY

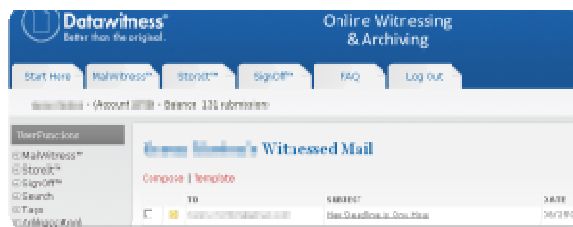

Datawitness uses a proprietary hybrid technology to provide unalterable and authenticated document delivery.

MailWitness™ helps you deliver when integrity and timing counts most.

Traditional email is an insecure and limited mode of communication despite it's rapid adoption among businesses.

Registered mail and courier are expensive and time-consuming.

Mailwitness™ email witnessing and tracking software captures the content, context and intent of communications between parties into an archived record.

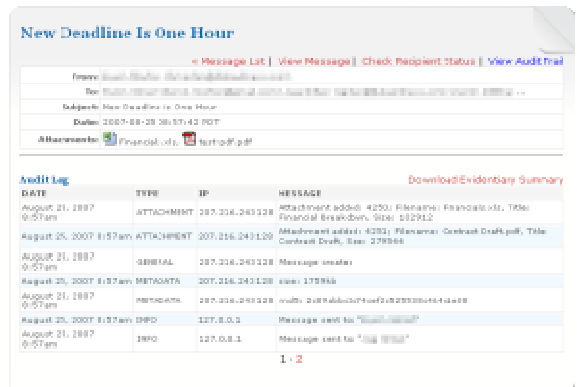

Green Tips:

- Use electronic communications in place of post-it notes, faxes and standard mail.
- Add a "Think before printing this email" note to the end of your correspondence. Apply this thinking to your daily practices too!

Benefits:

- **Trusted third party witness** to your emails
- **Verified message status** (received; ignored)
- **Increase delivery speed** and save your time
- **Reduce cost** of couriers and registered mail
- **Monitor message delivery** from your desk
- **No software** to install
- **Track delivery** and receipt of messages
- **Unalterable** and tamperproof records
- **Preserve** a record of MailWitness™ contents

For more information on how to send electronic documents quickly and securely using MailWitness™ call us at **1.866.273.6898**.
