

Datawitness Online Ltd.
Online Witnessing & Archiving

SignOff™

ONLINE CONTRACT SIGNING

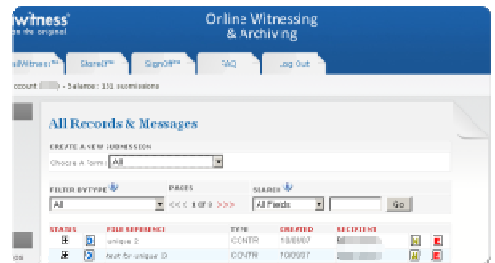

SignOff™ works as a 3rd party witness to authenticate the document and protect you if a dispute arises over the agreement using our proprietary hybrid archiving system for the lifecycle required of the original document.

SignOff™ is an online service that allows users to send contracts and receive signatures. SignOff™ witnesses the exchange to make a legally binding transaction.

Features:

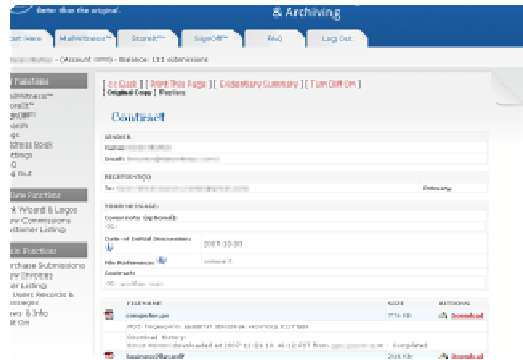

- **Legally binding** electronic signature capture
- **Simple** as sending an email
- **Authenticated** contract contents
- **Monitor delivery** and signature status
- **Best evidence** tool for online agreements
- **Instant delivery** to all involved parties
- **No software** to install
- **Sign easily** with just a click of a mouse

3 Step Process:

1. Select Recipients
2. Attach contract
3. Datawitness does the rest—sends the contract, gets the signature, witnesses the transaction, and archives the whole process

- No Couriers
- No Paper
- No Problems

“As we understand the Datawitness technology, the system is designed to produce an accurate and immutable record of electronic communications as they occur. Judges readily welcome such evidence.”

- Fasken Martineau

Businesses generally work in digital formats, so why increase paper and reduce efficiency by sending a contract for a wet signature?

For more information on sending contracts via SignOff™ call us at **1.866.273.6898**.
